

Health and Safety Policy @ Beovista[®]

At Beovista, we are committed to the health, safety and wellbeing of our team members, customers, and business partners.

We will demonstrate this by;

- Showing care and support for our fellow team members
- Ensuring we comply with legislation relating to health and safety, and meeting any obligations under the relevant codes of practice and industry standards
- Consulting and engaging our team regarding matters relating to health and safety
- Ensuring appropriate safety and personal protective equipment is available for our team
- Providing information and training to enable all team members to work safely
- Eliminating or minimising risks in the workplace to health and safety as far as is reasonably practicable
- Responding to any safety incidents or emergencies quickly and effectively

At Beovista we will never allow operational profit to take precedence over our commitment to health and safety. If there is ever a conflict, we all have the responsibility to choose health and safety first. Every team member at Beovista must also take reasonable care for their own health and safety, follow safe work procedures, participate in safety training, and report any health and safety hazards or incidents.

Please join me in looking out for one another so we can provide a safe workplace allowing our team at Beovista to be as successful as we can be.
